

Employee Computer Purchase Program

The District recognizes the benefits of computer technology in the curriculum and support-staff activities. It also recognizes the need to assist its staff in furthering their computer literacy. To achieve that goal, the District may designate on a year by year basis, up to \$25,000 of the prior year MCN ending balance to be used for loans to staff for the purchase of microcomputer hardware, software, and related equipment. This program may be offered only in years when the MCN ending balance is greater than \$100,000.

The qualifications and procedures are to be specified in the succeeding Administrative Regulation.
